

About the course

The BBA - Logistics program offers a comprehensive three-year curriculum. The initial two years are dedicated to intensive classroom learning, providing students with a strong theoretical foundation in logistics and supply chain management. In their final year, students transition to a mandatory internship, offering invaluable practical experience and a stipend.

For the academic year 2024-25, our students have secured significant internship opportunities:

- * Cogos Logistics, Bangalore: 3 students have been selected for internships at Cogos Logistics, providing exposure to dynamic logistics operations in a major metropolitan hub.

- * Cargomen, Singapore/India (Hyderabad Branch) and Reliance Warehouse : 54 students are currently in the final stages of the selection process for internships with Cargomen. These opportunities span both international and domestic operations, offering diverse learning experiences in a global logistics network and providing hands-on experience within a large-scale warehousing and distribution environment.

These strategic internship placements are integral to the BBA - Logistics program, bridging the gap between academic learning and real-world application, and equipping our graduates with the practical skills sought after by the logistics industry.

Apprenticeship opportunities at leading organizations:

We proudly announce that our 2023-26 batch has secured impressive apprenticeship opportunities at leading organizations:

- * Cogos Logistics (Bangalore): 3 students selected.**

- * Cargomen (Singapore/India - Hyderabad) & Reliance Warehouse: 54 students in the final selection stages.**

These apprenticeship offer invaluable real-world experience in dynamic logistics environments, both nationally and internationally. We commend our students on this significant achievement!
